

Strengthening Referral Hospitals in Post Conflict Afghanistan

Rural Expansion of Afghanistan's Community-based Healthcare (REACH) Program

A. Frederick Hartman MD MPH; M. Dad Shinwary MD;

W. Newbrander MHA PhD; Sallie Craig Huber MSPH

Management Sciences for Health
APHA Annual Meeting
November 7, 2007

Health Statistics in Afghanistan, 2004

- ➤ Maternal mortality: 1,600/100,000
- ➤ Infant mortality: 121/1,000
- ➤ Child mortality: 265/1,000
- ➤ Total Fertility Rate: 6.26
- ➤ Population Growth Rate: 2.5%
- ➤ Contraceptive Prevalence Rate: 10%
- ➤ One of 5 countries still having wild polio virus
- > 70,000 new cases of TB/year; 2/3 women

Source: Afghanistan Health Fact Sheet 2004

Contextual Challenges

- Inaccessibility (geography, climate)
- Security
- Ethnic and culture diversity

Health Systems Challenges

- Limited basic infrastructure
- Lack of *depth* in management and technical expertise
- Lack of data on health status, knowledge, attitudes and practices
- Balancing tertiary and primary services
- Donor/partner coordination

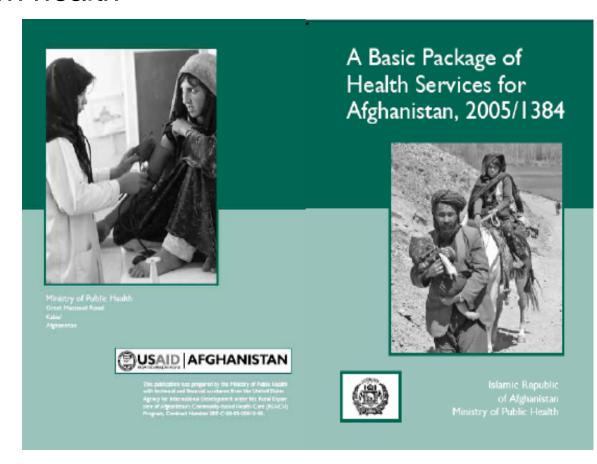

Key Policies: 2002-2006

- Contracting out services to NGOs
- Basic Package of Health Services (BPHS)
- Essential Package of Hospital Services (EPHS)
- Supplementary policies: maternal health, child health, health financing, disease surveillance and control

Contents of the BPHS

- Maternal and newborn health
- Child health and immunization
- Public nutrition
- Communicable diseases
- Mental health
- Disability
- Supply of essential drugs

Types of Basic Health Facilities

Health Post

Comprehensive Health Center

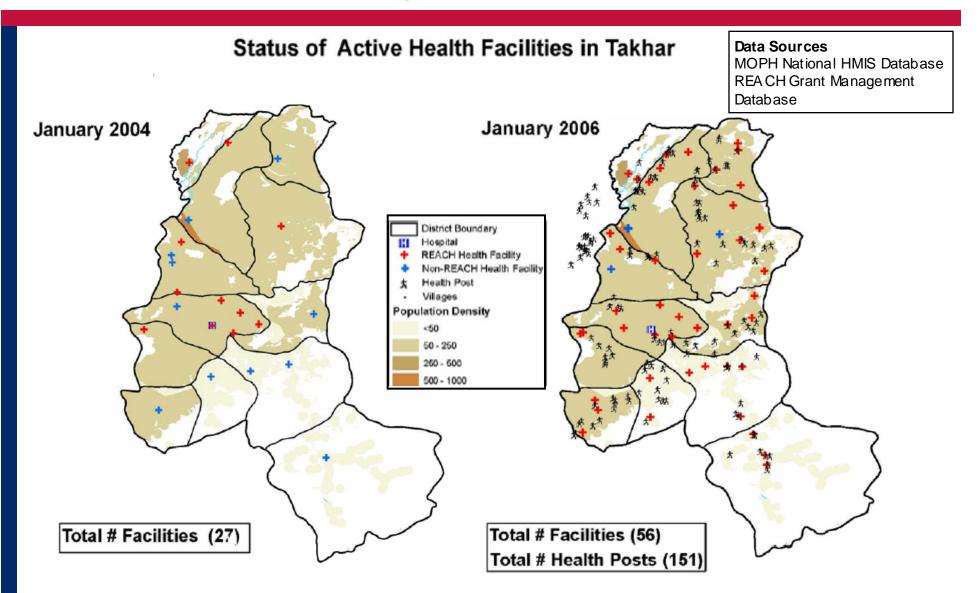

Basic Health Center

District Hospital

Expanding Coverage Of Health Services

Essential Package of Hospital Services

- Standardizes hospital services by level (Central, Regional, Provincial, District)
- Allows rational planning of staffing, equipment, formulary and supplies.
- Establishes national policy for hospital standards at each level
- Establishes policy for future hospital accreditation based on these standards

Hospital Management Improvement Initiative

Objectives

- To develop standards for hospitals in both clinical and management areas
- To develop a methodology and tools that can be applied to other hospitals
- To improve the quality of hospital care at all levels
- To strengthen the referral system

Standards-based Management Performance Quality Improvement

- Standards developed for both clinical services and hospital management*
- Participatory process involving international experts and Afghan providers
- Baseline survey of standards achievement in 5 provincial hospitals as initial field test
- Recurrent surveys over 3 years (2004-2007) to measure progress
- *Adapted from the Emergency Obstetric Standards originally developed by JHPIEGO

Surgery in Khost Provincial Hospital after surgical standards had been implemented

Lessons Learned

- Innovation in combining clinical and management improvements
- Post-training mentoring and networking among hospitals is essential to success
- Setting standards and establishing PQI teams helps sustain improvements
- Measurable improvement motivates staff for further improvement
- Provision of equitable pay, essential equipment, supplies and medication, and facility renovation to support management improvement is essential
