Celene L. Meyer, Director of Grants/Evaluation

November 6, 2007
APHA – Washington D.C.

The Population of Greater Houston is larger than the entire population of 16 states.

The Uninsured Population of Greater Houston is larger than the entire population of 12 states.

Understanding our Gaps

- **Texas:**
 - 28% of Texans under age 65 were insured in 2004.
 - Texas ranked last among states for insurance coverage.
- **Houston:**
 - -Screening resources for underserved women were at capacity
 - -Harris County Hospital District handles less than 30% of the total uninsured population.
 - -Disparities in breast cancer mortality rates found
 - -Long wait times for diagnostic and treatment services complicate treatment outcomes and options

Breast Health Resource Mapping Project
A joint project with The Breast Health Collaborative of Texas

[www.breasthealthtexas.org](#)

Welcome to the Breast Health Resource Mapping Project. This project was developed in partnership with the Breast Health Collaborative of Texas to help improve access to breast health services for the underserved and uninsured. This unique tool provides users with a single resource offering current and free health access information for breast health services and offers interactive mapping capabilities. The website helps individual users and case managers locate breast health treatment and diagnostic services including safety-net clinics. Users can locate services, view hours of operation, languages spoken and financial/eligibility requirements. In addition, the mapping capabilities of the website allow health planners to prioritize and identify underserved areas where there is insufficient capacity and help to determine expansion potential.

History:
In April 2005, St. Luke's Episcopal Health Charities (the Charities) presented its concept of an interactive Internet-based breast health resource website to the first Annual Greater Houston Area Breast Health Summit. The Summit, co-sponsored by The Rose and the Houston Affiliate of Susan G. Komen for the Cure brought together more than 140 breast healthcare providers, physicians, social services representatives, community members and survivors for the purpose of improving access to breast health care, particularly for low income and uninsured clients.

Summit attendees and leaders embraced the Charities' concept for an interactive web-based community resource focused on breast health. The summit attendees and leaders have since formed The Breast Health Collaborative of Texas.

Capabilities:
The Breast Health Resource Mapping Project is modeled after the Charities successful Project

Other Resources

Transportation Services
Please review each organization's profile to see if they offer transportation resources and for listings of public transportation that is available close to their locations.

The American Cancer Society also provides free, volunteer transportation for treatment and follow-up care as it relates to a cancer diagnosis. Please go to www.cancer.org/docroot/COM/content/div_TX/COM_5_1x_Cancer_Resource_Network_for_Patients.asp?sitearea to find more information about this program

Mobile Services
In addition to the services provided by the organizations listed in the Breast Health Resource Mapping Project, a few organizations provide breast health services through their mobile vans. For a listing of organizations that offer mobile services, please go to www.slehc.org/CWI/Mobile_Health/Members.cfm.

Eligibility Forms
Some of the organizations listed in the Breast Health Resource Mapping Project have eligibility forms that are available for you to review and complete prior to receiving services. Please look on each organization's profile to see if a form is available to you online.

The Harris County Hospital District's eligibility form can be found here:
Harris County Hospital District Financial Assistance www.hchdonline.com/patient/forecard/goldcard.htm

Mammography Usage Statistics
If you are looking for statistics for Mammography Usage, they can be found on the Texas Department of State Health Services' website in the Behavioral Risk Factor Surveillance System Data Table Look Up: www.dshs.state.tx.us/chs/brfss/query/brfss_form.shtm

Breast Health Collaborative of Texas
 Locate Clinics and Services

You can search for clinics and services using the select boxes below. You can search by just one category (such as zip code, or services) or you can search using several categories (like zip code AND services AND language). You can also choose more than one option within a select box. For example, you could search for results in several zip codes. To select more than one option, hold down the **ctrl** key on your keyboard when clicking on the options you want.

The list of cities and counties include only those places where an organization is actually located. "Area Served" means that the organization serves people who live in that county, but may not be located in that county.

Service Location:

Zip Code: 77002 77003 77004 77005 77006 77007 77008 77009 77010 77011 77012
