

# Creating Europe-wide health policies: A case study

Dr Fiona Adshead

Deputy Chief Medical Officer for England  
APHA, November 2007

# Setting the scene: What is public policy?

---

The background of the slide is a photograph of a bright blue sky filled with scattered white clouds. The text is centered over this image.

**Public policy-making – “The process by which governments translate their political vision into programmes and actions to deliver outcomes – desired changes in the real world”**

<http://www.policyhub.gov.uk/evalpolicy/index.asp>

# How does policy develop and change?

---

Changes are driven by underlying beliefs about:

- cause of problem, and effect of intervention,
- social climate - what is popular, what is acceptable
- power and influence of competing interests

## How:

- A balance between what is:
  - scientifically plausible
  - politically acceptable
  - practical for implementation

# How does policy emerge?

---

**Through  
revolution or evolution?**

# Tipping point in action

# Changing face of communications

## A nation of fatties

Britain is the fattest nation in Europe, according to an official report this morning.

Blair: live from Downing Street this morning

A detailed picture of the health of the nation, from our waistlines to our cigarette consumption - is being made available online by the Department of Health.

It highlights a significant North/South divide in England, with much higher rates of obesity and smoking in the North - and significantly lower life expectancy.

And the government is pledging to use the information to mount local campaigns targeting specific health problems

**This morning on Breakfast:**

- We talked live to the Prime Minister Tony Blair.

GOOD BUSINESS 

**SUMMARY**

**PROFILE OF A CONCERNED CONSUMER**

Do you agree or disagree with the following statements?

	Agree	Disagree
I think that businesses have a broader responsibility to society than just offering their goods and services at the lowest possible price	91%	9%
There are some companies that I actively avoid buying anything from because of their social, environmental or ethical behaviour	57%	43%
When I am trying to choose between products and services that seem broadly similar I base my decision on my overall impression of the company behind the product or service	77%	23%
Agree with all 3 (Concerned Consumer)	48%	52%

Re-shaping the global food industry**

**Clubs  
that Count**

# Framing the problem: Foresight Review on Obesity

- **What:** To build on scientific evidence base and provide visions of future to help inform government strategies, policies and practices
- **Why:** The obesity epidemic in UK cannot be prevented by individual action alone, and demands a societal approach
- **How:** Thinking creatively, and working together – in partnership between government, science, business and society

# But how did we get here?

## EU countries with some smokefree legislation

- A common understanding of the problem and how it is defined
- Collective action on key issues
- Many countries are going Smokefree
- Potential action on food labelling

# Partnerships built around people's lives: reaching people at work

**Well @ Work**

**Think Fit! Be Active!**

# Changing societies

# Mainstreaming joined up thinking

---

## **Rather than telling people what to do, Government must:**

- Understand and change people's lives
- Give power back to the people to take control of their health
- Shape culture and reach people at work, at home, at school with positive messages and support
- Balance the role of the individual with that of the State.

# Power to the people

---

When people have the tools, not only will they set their own agenda, they will communicate it on their terms

Question is – will governments be left in the dark?

# Principles of new European health strategy

---

- **A value-driven approach**
  - Health as a fundamental right
  - Engaging with citizens, providing information, equality, solidarity
- **Health is wealth**
  - The Healthy Life Years Indicator (HLY) in the Lisbon Agenda
  - Recognising the economic benefits of cost-effective health investments
- **Health in all policies**
  - Bilateral work with Regional Policy on Health Investments, healthy workplaces, enterprise and innovation
  - Encourages partnerships on all levels
- **Global health**
  - Strengthening EU voice on a global stage
  - Tackling shared issues such as pandemic, climate change

# Our common cause

---

***Government of the people, by the people, for the people***

# Remember...

---

***“Never doubt that a small group of thoughtful,  
committed citizens can change the world. Indeed,  
it's the only thing that ever has.”***

***Margaret Mead***
