

This free, interactive online tool is designed to help expand and connect the movement of individuals and organizations working to reverse the childhood obesity epidemic.

Two core “netcentric” features make this map unique:

- The Map is available as a widget. You can embed the map on your own website or blog. When someone signs up on any embedded map they will show up on every embedded Map. More locations -> more signups -> more people engaged.
- You can download names and emails of people who sign up. Contact other leaders or individuals in your area or working on your issues, expanding the base of people that you engage with.

How can you start using the Map of the Movement?

Three easy steps:

- Register as a leader at www.preventobesity.net.

- Take the Map widget and embed it on your website.

- Download names from the directory and start engaging with them.

We'll support you in your efforts

Support is available – call 800-399-9590, email info@preventobesity.net, sign up for a webinar or take an online tour at www.preventobesity.net/get-assistance

Visit www.preventobesity.net/map for more details and to sign up.
