The screenshot displays the ATHENA Hypertension Advisory interface. At the top, it shows the patient name and navigation tabs for Recommendations, Lifestyle, Adherence, Assumptions, and Patient Summary. A prominent alert states: "Blood Pressure apparently not under control: Based on last measurement of 145/92 taken 87 days ago on mm/dd/yyyy. 23% High". Below this, there are sections for Recommendations, Therapeutic Possibilities, Indications, and Contraindications. A graph on the right shows "Blood Pressure and Prescription History" with a line chart for blood pressure and a bar chart for medication usage. A feedback form is visible at the bottom right.

Simplified ATHENA Architecture
