Funded by the Rural South Public Health Training Center –
Reducing health disparities in medically-underserved, rural communities

Rural South
Public Health
Training Center

WHAT IS THE GOAL OF THIS PROJECT?

The HIV / AIDS Avatar Project has three main goals:

1. Provide relevant, factual information about HIV/AIDS to patients concerned about the virus and associated disease
2. Empower public health workers, especially those in the rural south and medically underserved areas, by providing them with model answers for some of the most common questions asked about HIV/AIDS by patients
3. Address the disparities present in the public health education about HIV/AIDS between the rural and more urban areas of Florida

HOW IS THIS PROJECT POSSIBLE?

The HIV Avatar Project is fully funded by the University of Florida, and therefore is free to use by the general public. All videos relating to questions about HIV/AIDS are hosted on YouTube through the University of Florida Department of Behavioral Science & Community Health's channel (youtube.com/UFBSCH).

Information on this website is adapted from *100 Questions & Answers about HIV/AIDS*©, a document released by the New York State Department of Health. The Centers for Disease Control & Prevention (CDC), National Institutes of Health (NIH), and the World Health Organization (WHO).
