

Dynamics and links between politics, policies and programs: The case of water fluoridation program in Korea

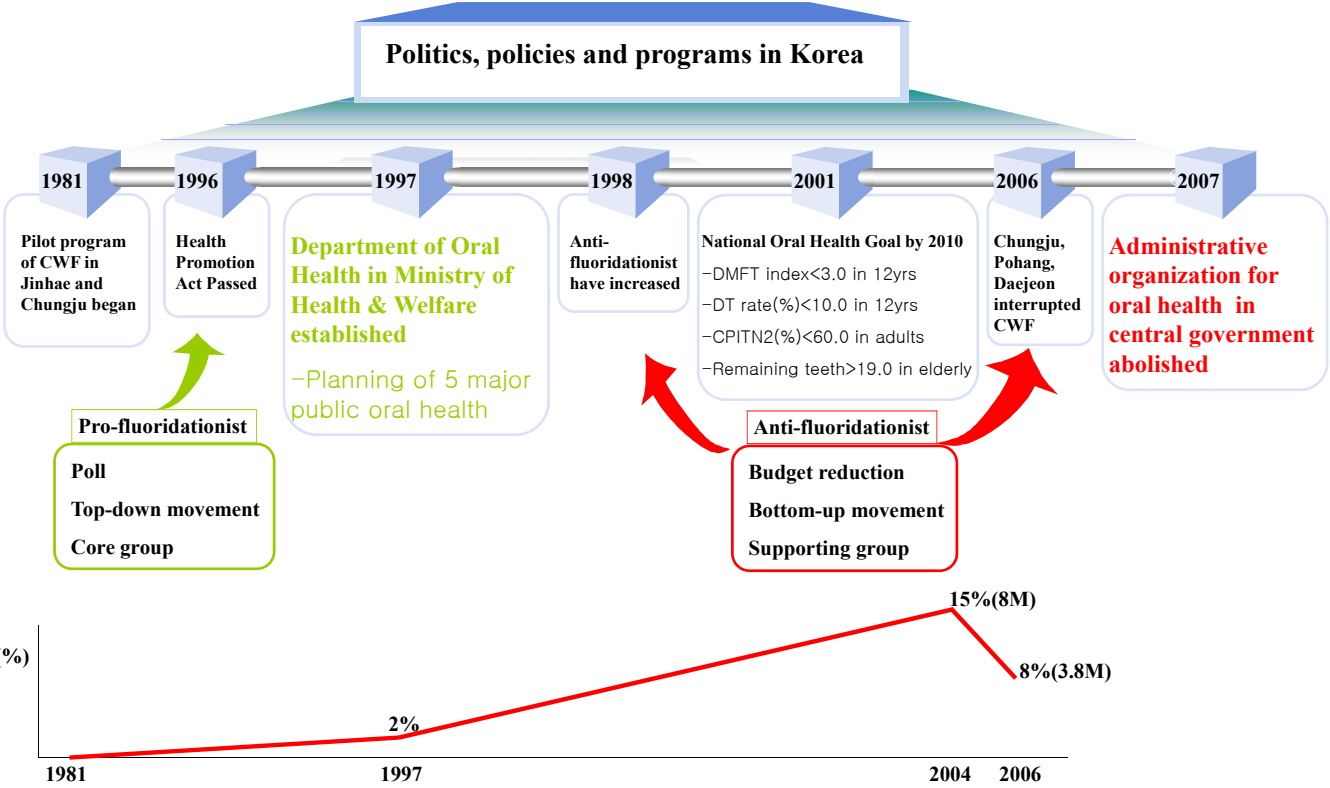

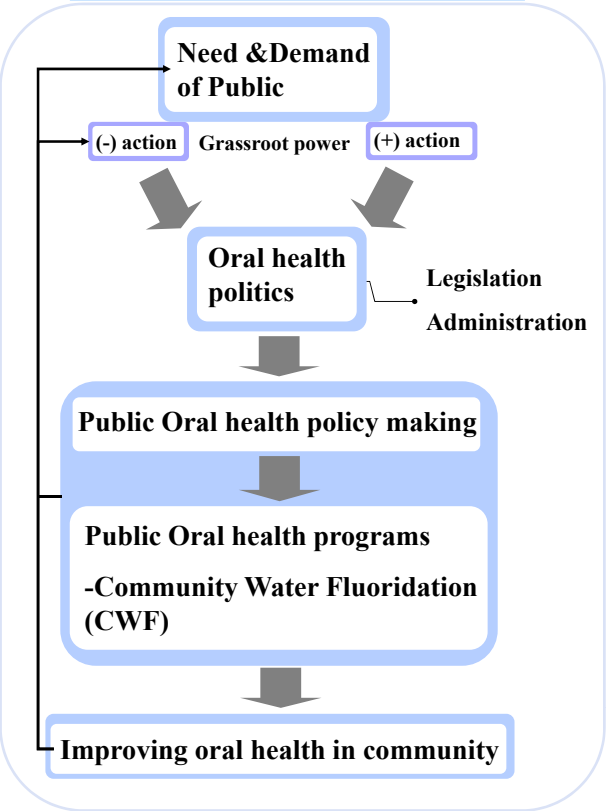

Dong-Hun Han, Hyun-Duck Kim*, Kwang-Hak Bae, Bo-Hyung Jin, Dai-Il Paik
Preventive and Social Dentistry, School of Dentistry, Seoul National University, Korea

Learning objectives

The participant will be able to

- 1) identify the ideal model that accounts for the structural links and dynamics of politics, policies and programs that determined the success of public health perspectives including oral health;
- 2) consider the realistic model of public oral health system and to find out the key factors for improving the public oral health.

Circulating & Hierarchical structure

Lack of the support from grassroots power cannot hold the CWF program nor keep the central administration in Korea.

- What is the future oral health going to be?
- What is going to be done? When, where, with whom, how?
